Chad Koslovsky

Networks people can rely on

Milliken, Colorado · chad@koslovsky.xyz

Senior IT Network Engineer | Spire

01 PROFILE

Systems and network engineer with hands-on ownership across an ISP, enterprise environments and managed-service clients. I connect infrastructure design with daily support, clear operating procedures and the follow-through needed to keep people working.

02 EXPERIENCE

Founder / Product Engineer / Systems Lead · Technomancy IT LLC | 2015-Present

Own client infrastructure and IT from design through deployment and direct on-call support, connecting networks, access, applications and operational tooling.

Senior Systems Engineer / Datacenter Architect · Front Range Internet Inc. | 2015-2020

Led the NOC, infrastructure operations and escalations across a multiyear tenure; became the sole systems engineer for about a year after the company purchase.

Migrated workloads from Hyper-V and ESXi to Docker and Kubernetes, upgraded server and firewall infrastructure, and ran SOC 1 and SOC 2 audits.

Systems / Software Engineer · Office Evolution | 2014-2015

Connected provisioning, onboarding, CRM and service operations across locations through centralized applications; worked with the CEO and CIO.

Network & Systems Engineer · PlumChoice / Everon | 2012-2014

Engineered and supported networks, systems and endpoints for MSP clients, using monitoring and diagnostic tooling to investigate issues across the environment.

Provided on-call support and antivirus services, working directly with business owners and end users.

Infrastructure and Systems Focal · IBM | 2010-2012

Supported shared enterprise infrastructure, hosted desktops and virtualization labs. Automated audit and backup workflows and coordinated incidents and production changes.

03 SELECTED WORK

Excell Services | Legacy infrastructure and branch connectivity · Technomancy IT client, Wray, Colorado

Replaced or rebuilt legacy servers and employee computers, upgraded networks, and connected a satellite location with VPN, Windows Server and Active Directory.

Investigated wasted network costs and secured a one-time $15,000 CenturyLink refund.

Technomancy | Repeatable delivery and recovery · Own technical practice and operating platform

Built deployment tooling around versioned images, migrations, health checks and deployment records, plus a backup restore-verification workflow using a disposable PostgreSQL instance.

04 CAPABILITIES

Routing, DNS, VPNs, firewalls and multi-site connectivity · Infrastructure modernization; Hyper-V, ESXi, Docker and Kubernetes · Terraform, Ansible, Python, PowerShell and shell automation · Monitoring, recovery verification, on-call escalations and SOC audits · AWS and Azure infrastructure; identity and access integration
